

SAHARA RIDER 2011

Thank you very much for choosing us to appear at your event and please find below some requests we have to make sure the entertainment runs smoothly on the day.

1. Parking for 4 cars plus trailer.
2. We can usually set up within an hour, however if the access to the performing area is difficult (e.g. stairs with no lift option) we will require additional crew. If you have any concerns, please speak to your booking agent.
3. Safe and adequate supply of electricity. The band, including lighting, draws up to 28 amps, so requires a minimum of 3 x 13A mains wall sockets adjacent to the stage. For outdoor events, including marquees, a dedicated supply of 32 amps single phase at 240V is required. Further details available on request.
4. Safe, covered area in which to play, preferably 6m x 3m, plus a little extra if DJ option is included.
5. Private room or area with heating, lighting and seating, suitable for the number of performers booked, for use of the band to change in, leave personal belongings and rest in during breaks. We're very happy to share with other performers and staff but the area must be separate from guests and the general public.
6. If the band is required to arrive before 6.30pm to set up, food and soft drinks would be very much appreciated. If this is not possible, please let your booking agent know in advance so the band can make other arrangements.
7. The band can bring an electronic drum kit to use in venues with sound limiters. Please let your booking agent know in advance if your venue uses a sound limiter.

If you have any questions, or if any of these requests are likely to be a problem, please don't hesitate to contact your Entertainment Agency to discuss. Thank you.
