

## SAHARA RIDER

*(Updated 1<sup>st</sup> Dec 2008 and supercedes all previous riders for Sahara)*

Thank you very much for choosing us to appear at your function and please find below some requirements we have to make sure the entertainment for your event runs smoothly on the day.

1. Parking for up to 5 cars plus trailer.
2. Our usual set up time is up to 2½ hours, although shorter set ups and split set ups may be able to be arranged with advance notice. If the access to the stage area is lengthy or via a lift, please let us know in advance so we can allow extra time to get the equipment in and set up. Difficult loads (especially stairs) may incur fees for additional crew.
3. We also need a safe, covered area in which to play, including an adequate safe supply of electricity. The band (including lighting) draws up to 28 amps at full power so we require a minimum of 3 x 13A mains wall sockets adjacent to the stage, or for outdoor events, including marquees, a dedicated supply of 32 amps single phase at 240V. Further details available on request.
4. Stage or setting up area of 20 x 13 feet (or 6m x 4m) plus extra if DJ option is included. The band can set up on smaller stages if there is room to put some of the equipment off the stage to the sides.
5. Private room with heating, lighting and seating, suitable for the number of performers booked, for exclusive use of the band to change in, leave personal belongings and rest in during breaks.
6. Substantial hot meals for band and crew members (including one vegetarian if five piece option is selected, two vegetarian if six piece or upwards) plus soft drinks for the duration of time the band are at the venue, in order for us to perform at our best. Please remember that we are typically on site for over 10 hours.

If you have any questions, or if any of these requests are likely to be a problem, please don't hesitate to contact the Entertainment Agency or ourselves to discuss. Thank you.
